

Basic Detail Report

Bridge of Eight Parts, Province of Mikawa

Date

ca. 1834

Primary Maker

Katsushika Hokusai

Medium

Color woodblock print

Description

Yoko-e. The bridge is built in a series of platforms raised over a swamp. While some people are crossing the bridge with burdens, others are strolling along and admiring the clumps of irises growing below. Cloud-bands are used here to emphasize the misty poetic character of the spot, contrasted with the clear delineation of the foreground.
